

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State/Territory: Maine

Citation	Condition or Requirement
1906 of the Act	State Method on Cost Effectiveness of Employer-Based Group Health Plans

The methodology as outlined in SMM Section 3910.11 (Secretary's method) will be used to determine the cost effectiveness of an individual's enrollment in a group health plan. Further, the recipient's specific health-related circumstances will be considered when the process in section 3910.11 indicates that the cost effectiveness test is not met. For example, if the recipient has a medical condition which will likely increase his/her medical expenses above the average, the additional anticipated expenses related to the recipient's condition will be used to determine if it will then be cost effective to pay for the group health plan.
